

OBINNA ISHMAEL ILOANYA

ABOUT ME

I am a self taught web developer. I try my best to write clean codes and I genuinely love to learn. I am currently looking for the right opportunity to work in an environment where I can make an impact as a developer and an environment that will help me progress into a full-stack role.

I am not all in for the money, I just want to be given a chance and an opportunity to grow as a developer. I am punctual and precise, I joke when it is time to joke and I am extremely serious when I need to be serious. My only fear is failure and the only way I can beat that is by working harder than normal which I believe I am trying to be better than the way I was yesterday.

WORK EXPERIENCE

I have worked with few developers and we developed the front end of company websites. Been a freelance developer on Upwork also.

Developed the front end for few companies like [AGC RECRUITERS](#), [OGBE GROUP](#) using Javascript, HTML, CSS and BOOTSTRAP.

I have been a professional graphics designer since 2012 and I have worked with loads of companies in rendering services like LOGO designs and I have also worked as brand manager with [FOBE NETWORK](#), [FOBE MODELING AGENCY](#), [BELLA BEAUTY ORGANICS](#). and some other SMEs.
